

Hadron Collider Physics Symposium in "La Biodola"

Pictures of the conference site resort

Based on the 2007 very positive experience we can offer to host again in 2011 the Symposium in "La Biodola", the most exclusive bay of the Elba Island, in the Hermitage Hotel next to a beach with golden sand. At the Hermitage excellent conference services and facilities can be provided:

- a large Auditorium (~ 380 people) for plenary sessions,
- space for poster sessions (~160 posters 70x90 cm²)
- projectors for transparencies and laptops,
- a number of desktops connected to a fast LAN
- wireless LAN for laptops in the conf. room and in the Hotel
- A number of interesting social events and excursions can be planned.

What we can offer to the participants of the Symposium is an efficient and thoroughly tested organization, nice environments, pleasant weather and last, but not least, very good food!

We understand that in 2011 **Paris** could have priority since **Pisa** already hosted the Symposium. However we would be happy to host it again in 2011 or, may be, in 2012

On behalf of the INFN Pisa Section,
